

Homework – Week3 (Individual)

MSAN 603, Diane Woodbridge

Description

1. When registering a user, throw an error if the username is already registered (30 %).
Test : Calling <http://localhost/register> twice should throw an error.

← → ↻ ⓘ localhost/register

Error - Existing user : diane

2. After a user is authenticated, they should be automatically redirected to *secret_page* (30 %).

Test : Calling http://localhost/secret_page should render secret_page.html with the current user's username and email.

← → ↻ ⓘ localhost/secret_page

The secret agent, diane is logged-in.
diane@gmail.com is super awesome.

3. Make sure that *secret_page* can be only accessed by authenticated users (30 %).
Test: Calling http://localhost/secret_page after <http://localhost/logout> should throw an error.

← → ↻ ⓘ localhost/secret_page 🔍 ☆ 🌐 📄 📱 ⋮

Unauthorized

The server could not verify that you are authorized to access the URL requested. You either supplied the wrong credentials (e.g. a bad password), or your browser doesn't understand how to supply the credentials required.

4. Update "routes.py" to satisfy the PEP8 standards (10 %).
 - If you run `pycodestyle routes.py > output.txt`, the output (output.txt) should be an empty text file.

Submit the hw_week3.zip file - the name of your file should be

hw_week3_Lastname_Firstname.zip.

Make sure your code runs in **Python 3.7**.
